A temperature of about 15 degrees is ideal. Brottopfe and optimal pion boxes ideal for this. Should you keep the pion in the kitchen armory? Fresh pion is delicious. Therefore, it should be well stored at home. In most enemies, it is better to do without storing pion in the kitchen armory. The reason is a rude aging in the sense of loss of taste. The bakery is better in front of the mold, but with normal climate or humidity the negative effects on weighing. In the case of a profanity in days of venue, however, this rule may be an exception, since in this climate there is a mold violation. Help the plain in a plastic or packaging paper? Plastic bags are not suitable for storage. The reason is the mold -rude formation, usually after four days. The moisture of the roasts Ā Ē ours can escape the tubes and decreases the pan outside. An ideal floor for mushrooms. This also applies to the original plot packaging to which the pion is sold mainly in the supermarket. You must dispose of them quickly and put the pion in a box. Simple as well also offer few advantages. Here the problem is less the mold, but the rough drying. Here too, the pion becomes insignificant after four days. The coated paper is better, as you can get them in most bowls. The pion is fresh in them for seven days. You can freeze the pan and, if so, how long? Pan can be frozen relatively well. You can freeze the whole body or individual slices. This last has the advantage of specifically removing the right amount and windows can simply be used in the toaster if it needs to be done quickly.
